

# Busha; Illyrian Cattle; Brachyceros

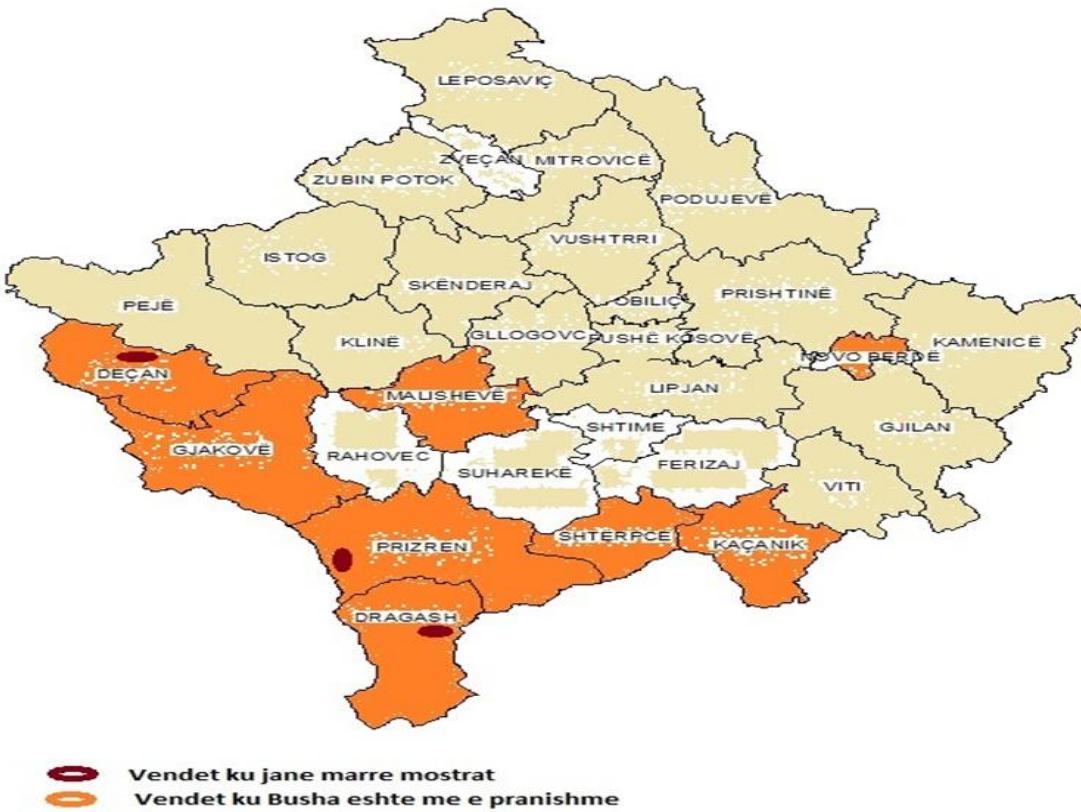

- Farms of Busha cattle are small (2 head),
- Oriented in meet their own family consumption.
- A Cow per year, one lactation and a calf.
- More than 8 lactation
- Good fertility
- High resistance
- Compared to live body weight, produce reasonably well...

# **The overall activities undertaken in 2012:**

- **Identification of bovine bush in Kosovo.**
- **The advantages of breeding cattle Bush compared with other breeds of cattle and other species.**
- **Identification of Busha products and marketing.**
- **Study breeding Busha in relation to the environment.**
- **The study of economic parameters for different features.**
- **Recommendations for stakeholders (farmers, government institutions, associations, processors, consumers, tourism, etc..),**

# Dukagjini Busha

*Dr.sc Hysen Bytyqi. University of Prishtina, Kosovo*

# Sharri Busha

*Dr.sc Hysen Bytyqi. University of Prishtina, Kosovo*

# Grazing environment for cattle in Kosova.....

# Cattle fairs in Kosovo !!!

# To compete with other breeds!!!!

# What next.....

- **Joint project application, including:**
  - **Wider traits (production, fertility, resistance, etc).**
  - **Management advantages,**
  - **Rural development impact**
  - **Country Research and development (R&D) strategies .**
- **Potential target: FP7, FAO.....**
- **Network existing**
