HIGHLY ENDANGERED BREED COWS

There is no breeding program or plan for the preservation, protecting and improvement of breeding

No support for breeding from state...

No breeders Association

Investigation on Bosnian Busha cattle

Conservation priorities of genetic diversity in domesticated metapopulations: a study in taurine cattle breeds (2011). *Ecology and Evolution* 1(3) (408-420)

The large genetic variability....

Polymorphism of the kappa-casein gene in two Bosnian autohtonomous cattle breeds (2010). *Archiv Tierzucht* 53(277-282)

High frequency of the B allele
provides for good cheese - making properties

Proposal

Preservation of endangered Busha cattle

Determination the population size, production and phenotypical characterisation

Making sustainable breeding plan

proposal

Planing breeding programs according to breeding plan

Execution and control of breeding programs

Recommendation for branding products
(cheese and meat)

Thanks for attention
